

WASHABLE CUSTOM PRINTED FACE COVERINGS

MADE IN THE USA, IN LAS VEGAS, NV

Team Player. Team building. Team Spirit. As we return to our offices, stores, restaurants, and manufacturing warehouses let's remind our employees that we are attentive to their health and safety. We will logo your company masks – we can even add the team member's name – and stand up for America by keeping our faces covered! Take a look – we can incorporate your logo into any background or on any color – on these dye-sublimated masks with wide, comfortable, soft elastic ear-bands. Pricing is simple – the more you buy the less they cost. Minimum order for customization is only 20! These will also be great branded giveaways at your next trade show. Wearing a mask is showing respect.

Staying safe and respecting and protecting the well-being of others by shielding mouths and noses from germs and viruses, while protecting everyone's respiratory system will aid in keeping your entire team healthy and safe.

SIZING GUIDE

Size	Measurement
Small	3.5" to 4"
Medium	4" to 4.5"
Large	4.5" to 5"

Our USA Made Fabric Face Masks,

are manufactured from 100% American-made materials and consist of 98% Polyester and 2% Spandex, can be reused and handwashed in cold water and soap then hung to dry. They can be microwaved for 1 minute ONLY to help kill bacteria.

- Cloth face coverings provide an extra layer to help prevent respiratory droplets from traveling in the air and onto other people.
- Your cloth face covering protects them and their cloth face covering protects you.
- As a precaution against the viral infection, reusable cloth face masks may work as the first line of defense against transmission.
- In cases where maintaining social distancing may not be possible such as offices, workshops, factories, public transport, and tradeshows, wearing face masks will minimize risks of transmission.
- It will help slow down the spread of virus if everyone is cautious about not getting infected and spreading the infection to others.

• The emerging community-based transmission can be stopped if people wear disposable or reusable cloth face masks in public settings
